

POSTER COMPETITION

(For Class 9 to 12 & Diploma Level)

EVENT DATE: 14/05/2022

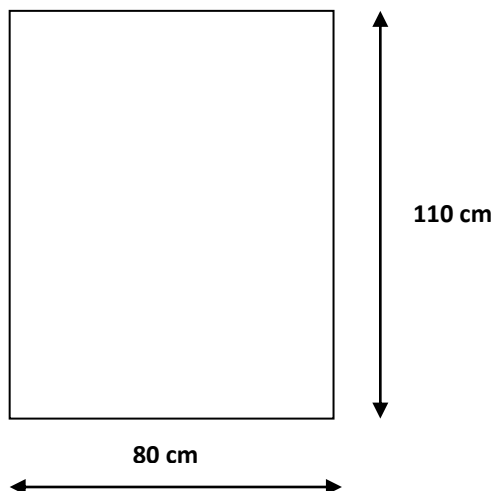

Poster Presentation Topic: Waste to Energy

At present, waste can be classified as municipal solid waste, process waste, medical waste and agricultural waste. Urbanization and population growth are key factors of waste generation in developing countries. However rapid enhancement in waste production will have a negative impact on human health and local environment.

The main motive of this poster presentation on the theme: **Waste to Energy** is to share ideas or techniques for converting waste to energy which will meet the future challenges on waste management system.

DETAILED GUIDILINES FOR POSTER PRESENTATION

- **Maximum** 2 numbers of students can participate in a group.
- The size of the poster for presentation is 80cm x 110 cm in portrait mode. You can download the predefined poster format from https://www.gimt-techmilap.in/documents/Techmilap_poster_format.ppt
